MAMOLI. PROGETTARE IL QUOTIDIANO. PROGETTARE L'ACQUA.

Progettare l'acqua. Perché Mamoli è un'azienda radicata nella storia italiana ma con una forte visione del futuro. Un'azienda capace di rinnovarsi ed evolvere pur rimanendo fedele a se stessa e coerente con i principi fondamentali della propria filosofia aziendale: qualità, funzionalità, rispetto e good design.

Progettare l'acqua. Perché si è consapevoli della nostra storia e perché è necessario guardare al contemporaneo con mente aperta al futuro. Perché oggi la ricerca di stimoli attivi di natura ambientale e sociale è un percorso da seguire, aperto a nuove risposte. Solo chi è disposto a cambiare rimane nel tempo, e cambiare significa anche saper leggere con sensibilità e prontezza gli stimoli che provengono dalla società, dai comportamenti, dai desideri dell'immaginario collettivo e dai mutamenti di contesto.

Progettare l'acqua. In quanto dimensione domestica e parte della nostra quotidianità. Perché significa tradurre nel quotidiano gesti rituali, semplici e sicuri che nascono dalla confidenza con la linea pura, elegante della forma. Gesti rituali, che si arricchiscono di sottili piaceri tattili, che si traducono in percezioni positive di comfort assoluto. Gesti che scandiscono il nostro tempo.

Progettare l'acqua. In quanto risorsa pubblica e patrimonio comune, così come il design industriale è patrimonio culturale italiano, immagine riconosciuta di ciò che c'è di bello nella nostra storia e nel nostro futuro, democraticamente accessibile. Perché il design non è sinonimo solo di lusso. È il bello alla portata di tutti. Così come l'acqua deve essere il buono alla portata di tutti.

Progettare l'acqua. E le sue vie di impiego all'interno dei processi produttivi con la consapevolezza della sua esauribilità. Per avere sempre nuovi stimoli nella ricerca di soluzioni tecnico-produttive innovative che la tutelino e la preservino.

Progettare l'acqua. Per proporre nuovi e avanzati modelli di sviluppo sostenibile, unitamente alla promozione dello sviluppo economico e sociale. Per stimolare la riflessione delle nuove generazioni e della più fresca progettualità. O più semplicemente per dare il piacere quotidiano di sentire scorrere l'acqua nelle nostre mani.

Progettare l'acqua. Perché è quello che abbiamo sempre fatto dal 1932, con passione ed amore.

FRIENDLY DESIGN:

Siamo convinti che la riflessione progettuale abbia il dovere di prendersi cura del benessere, della sicurezza e della salute di coloro che quotidianamente utilizzano i nostri prodotti. Per questo, all'interno dei nostri processi produttivi, utilizziamo esclusivamente materiali compatibili al 100% con acqua potabile, certificati ACS e leghe di ottone conformi al D.M.174. Inoltre, per la realizzazione dei nostri prodotti vengono utilizzate tecnologie produttive all'avanguardia come il processo galvanico PWP, Pure Water Process, che utilizza nichel insolubile. Questo consente un rilascio di nichel di gran lunga al di sotto dei valori imposti dalle più severe norme internazionali (NSF 61, USA ; DWG, Germania ; NF, Francia ; 174, Italia) a garanzia della loro totale salubrità.

DESIGN SOSTENIBILE:

Ci impegniamo nella creazione di prodotti e sistemi che minimizzino il consumo energetico e riducano lo spreco di risorse durante l'utilizzo, attraverso l'uso di tecnologie innovative e packaging in cartone riciclato biodegradabile. Investiamo in Ricerca & Sviluppo per trovare nuove soluzioni progettuali e produttive che portino ad avere prodotti e processi rispettosi dell'uomo e del suo habitat. Poniamo la massima attenzione all'uso responsabile delle risorse, preservando le fonti di energia non rinnovabili, ottimizzando i processi di produzione e attuando una pianificazione accurata. Per questo abbiamo predisposto impianti produttivi a circuito chiuso, dove l'acqua utilizzata nei processi galvanici viene depurata e riutilizzata in nuove produzioni. Per questo abbiamo realizzato un processo di gestione e lavorazione dei residui produttivi, che non vengono così dispersi nell'ambiente ma trattati a protezione del nostro ecosistema. Per lo stesso motivo, ogni singolo prodotto che esce dai nostri stabilimenti viene sottoposto a prove di tenuta tramite macchine pneumatiche. Il meccanismo di collaudo ad aria permette di unire una maggiore precisione di misurazione a una migliore gestione delle risorse, innalzando contestualmente il livello qualitativo del prodotto. Il ciclo produttivo interno consente inoltre un continuo monitoraggio delle fasi di lavorazione del prodotto e della loro conformità a quanto prescritto dalla norma UNI EN ISO 9001:2008 nonché la verifica costante della qualità dei prodotti.

DESIGN CERTIFICATO:

Lo stile e il gusto sono tipicamente italiani. L'attenzione e il rigore con cui disegniamo e progettiamo ogni rubinetto sono valori qualificanti della nostra tradizione produttiva, ispirata ad una filosofia di Qualità Totale che ha trovato conferma nelle certificazioni dei massimi enti nazionali e internazionali. Un impegno costante nel progettare e costruire prodotti che, per caratteristiche tecniche e funzionali, soddisfino pienamente i requisiti imposti dalle differenti normative vigenti in Italia e nei paesi di esportazione.

MAMOLI. DESIGNING THE EVERYDAY. DESIGNING WATER.

Designing water. Because Mamoli is deep-rooted in Italian history even as it nurtures a bold vision of the future. A company with the ability to renew and evolve while remaining true to itself and upholding the basic pillars of the company's philosophy: quality, functionality, respect and good design.

Designing water. Because we know our history and because the contemporary calls for attentive eyes and minds that are open to the future. Because today's path is open to new answers in the search for active social and environmental stimulation. You can endure over time if you are always ready to change, but to change entails the prompt and sensitive ability to interpret the stimuli being broadcast by society, behaviors, the desires of the collective imagination and changing contexts.

Designing water. As a dimension of domestic life and a slice of our everyday life. Because it means finding everyday life in the guise of ritualistic, simple and secure routines that grow out of confidence in the pure and elegant lines of a form. Ritual gestures embellished with subtle, tactile pleasures translate into positive perceptions of absolute comfort. Gestures reflecting our times.

Designing water. As a public resource and common heritage, just as industrial design is the cultural heritage of Italy and democratically accessible, as represented by the beauty witnessed in our past and future. Because design is not synonymous with luxury. Beauty within the reach of everyone. Just as water should be good and within the reach of everyone.

Designing water. And our awareness of its limited quantity in the ways we utilize it in manufacturing. For never lacking new stimuli during the search for innovative technical-manufacturing solutions that protect and preserve it.

Designing water. For proposing new and advanced models of sustainable development coupled with the promotion of social and economic development. For stimulating the minds of a new generation and fresh design concepts. Most simply, for providing the everyday pleasure of feeling water running over our hands.

Designing water. Because this is what we have been doing with passion and love since 1932.

FRIENDLY DESIGN:

We are convinced that the contemplation of design includes a duty to account for the well-being, safety and health of everyday users of our products. To apply this concept, our manufacturing facilities utilize only ACS-certified materials that are 100% compatible with drinking water and brass alloys with ultra-low nickel and a reduced percentage of lead in compliance with M.D. 174. Moreover, our products are created using state-of-the-art manufacturing technologies, such as the galvanic PWP (Pure Water Process) that uses insoluble nickel. This holds nickel release well below the thresholds established by the strictest of international standards (NSF 61, USA ; DWG, Germany ; NF, France ; 174, Italy) to guarantee total wholesomeness.

SUSTAINABLE DESIGN:

We dedicate ourselves to creating products and systems that minimize energy consumption and preserve precious resources during use through innovative technologies and recycled, biodegradable cardboard packaging. We invest in Research & Development in the search for new design and manufacturing solutions that generate products and processes that are respectful to humankind and its habitat. We focus maximum attention on the responsible use of resources through the preservation of non-renewable energy resources, the optimization of manufacturing processes and the implementation of precise planning. To achieve this we use closed-loop manufacturing systems that re-purify the galvanic processing water for subsequent re-use in other production runs. To achieve this we have created a management and treatment process for manufacturing residues that limits their dispersal into the environment and helps protect our ecosystem. For the same reason, every single product that comes out of our manufacturing facilities is subjected to leakage testing with pneumatic machinery. The air-based testing device makes it possible to combine higher precision of measurement with better resource management to raise the quality level of the final products. The internal manufacturing process also enables continuous monitoring of the product treatment phases and their conformity with UNI EN ISO 9001:2008 standards, not to mention ongoing quality checks of the products that come out of our facilities.

CERTIFIED DESIGN:

Characteristically Italian style and taste. The attention and precision behind the design and engineering of each tap represent core values of a manufacturing tradition inspired by a Total Quality philosophy, which is reflected in the form of certifications from the top national and international authorities. An unwavering commitment to the design and manufacture of products whose technical and functional characteristics fully satisfy the requirements of current standards in Italy and export countries.

Euclide

Design - Alessandro Mendini

Euclide. Forma primaria di geometria antica

Da tempo avevo in mente di disegnare un rubinetto costituito da un parallelepipedo. Un volume elementare da cui far uscire dell'acqua.

Sezioni quadre e schematiche, linee parallele, superfici diritte, piatte e lucide.

Ecco perciò il rubinetto Euclide, forma primaria di geometria antica.

Mamoli mi ha fornito questa occasione.

Ha approfondito la tecnica e le funzioni, poi abbiamo articolato tutta la serie, con grande piacere e velocità.

Alessandro Mendini

Euclide. Primary form of ancient geometry

For some time now I had been thinking about designing a tap in the form of a parallelepiped. A basic volume from which water would pour. Square and schematic sections, parallel lines, straight, flat and polished surfaces. This is Euclide, a primary form of ancient geometry. I was given this opportunity by Mamoli. They studied the technique and the functions and then we prepared the whole series, with great pleasure and speed.

Alessandro Mendini

Paola & The Kitchen

Design - Paola Navone

Paola&TheKitchen Poetica ironia e funzionalità

Una leva leggera e colorata si appoggia su una struttura cromata e lineare come delicata contaminazione all'essenzialità dell'oggetto e valore aggiunto alla sua semplicità e praticità. Forse è un petalo carico di una sua seduzione naturale. Forse è la leva di comando, grande e colorata, di un vecchio macchinario industriale. Fortemente evocativo, «Paola&TheKitchen» è soprattutto un rubinetto pensato per essere usato con facilità grazie alla forma organica e generosa delle leve che offre la presa al gesto rapido del cuoco improvvisato come a quello sapiente del maestro. Perché così è più divertente cucinare.

Paola&TheKitchen Poetic irony and functionality

A light, coloured lever rests on a sleek, chrome body making a delicate impact on its essentiality and enhancing its simplicity and practicality. It resembles a petal rich in natural seductive charm or the big, coloured control lever on an old industrial machine. Highly evocative, "Paola&TheKitchen" is a tap that has been designed to be practical thanks to the generous, natural shape of the levers which can be quickly and easily operated by both novices and professional chefs. All this makes cooking so much more fun.

Cook

Design - Sovrappensiero Design Studio

Today's menu :
Cook, color & happiness

Cook. Design animista e contaminazione

Cook reinterpreta e trasporta i rubinetti a molla per cucine industriali in ambiente domestico. I due mondi si incontrano in forme gentili: il freddo acciaio abbraccia e sostiene il silicone, morbido e colorato. La cucina contemporanea non è più l'officina dove preparare i pasti, ma un luogo dove sperimentare e divertirsi, da soli o in compagnia. Cook nasce per unire la funzionalità e la flessibilità di un rubinetto professionale al calore e ai colori di un momento di svago.

Cook. Animist design and fusion

Cook reinterprets and transpose spring taps for industrial kitchens to the home. The two worlds meet in agreeing forms : the cold steel embraces and supports the silicone, soft and colorful. The contemporary kitchen is no longer the workshop where meals are prepared, but a place to experiment and have fun, alone or in company. Cook was created to combine the functionality and flexibility of a professional tap to the warmth and colors of a moment of leisure.

Fuente

Design - Marco Baxadonne

Fuente.

Progettato da Marco Baxadonne, Fuente è senza dubbio una serie con un disegno moderno assolutamente innovativo e sorprendente. Le manopole, inusuali per un rubinetto, trovano subito simpatia e praticità d'uso. Sembra di averle sempre usate, forse per la loro ergonomia. La bocca, squadrata e sottile, fa sgorgare l'acqua come se fosse quella di una cascatella, regalando sensazioni inaspettate. Fuente ha un design moderno, ma evoca ricordi nei quali vediamo le nostre mani accarezzate dall'acqua della fonte. Per questo un ambiente arredato con Fuente ci mette subito a nostro agio, come se lo avessimo già abitato. La modularità e l'abbinabilità a schema libero degli elementi rendono Fuente non una serie di rubinetteria conclusa, ma piuttosto un processo in evoluzione che offre delle risposte ai bisogni personali e progettuali di ogni singolo individuo. Grazie infatti alla possibilità di combinazione libera di moduli compositivi, Fuente si avvicina concretamente a questo pensiero, con idee aperte e prospettive..

Fuente.

Designed by Marco Baxadonne, Fuente is undoubtedly a range with a modern, decidedly innovative and surprising style. The unusual dial-type tap handles are both appealing and practical, and so ergonomic as to give the impression of timeless use. Water issues from the slender oblong-section spout like a cascade that gifts unexpected sensations. Although modern, Fuente evokes recollections of our hands caressed by spring water. Any environment furnished with Fuente puts us immediately at ease, as if it were already familiar to us. Open-scheme modular composition and combinability of elements make Fuente not so much a set range of fittings as an evolving process through which the individual can realize his/her personal and design requirements. Thanks to the possibility of combination absolutely free of modules of composition, Fuente approaches this concept offering open ideas and perspectives.

Ortigia

Design - Fabrizio Batoni

Ortigia. Estetica contemporanea e suggestioni neobarocche

Il sole batte sui muri, l'aria intensa e profumata corre lungo i vicoli: fotogrammi eterni impressi con la bellezza di sempre nelle eleganti forme di Ortigia.

Esile, astratto e leggero, Ortigia stabilisce un intenso legame emozionale con l'utilizzatore, trasmettendo suggestioni ed evocando ambienti neobarocchi.

Il design non segue una forma a priori, ma permette alle diverse parti di dialogare tra loro, la luce si riflette scivolando dalle parti curve a quelle lineari, esaltando la natura dinamica del progetto e regalando così una forma agile ed evocatrice, nella propria sensibilità contemporanea, di una tradizione ancora tutta da rivivere.

Ortigia. Contemporary aesthetics and neo-baroque influences

The sun shines on the walls and intense, fragrant air pervades the alleyways: snapshots of times past portraying the same everlasting beauty in the elegant form of Ortigia. Slender, light and abstract, Ortigia establishes a deep emotional bond with its user conveying emotions and evoking neo-Baroque times. The design does not follow a preconceived form but allows the various parts to communicate with each other. Light reflects and flickers from the curved to the straight parts exalting its dynamic design and creating an agility that evokes a tradition that can be relived in a contemporary key.

O₂

Design - Fabrizio Batoni

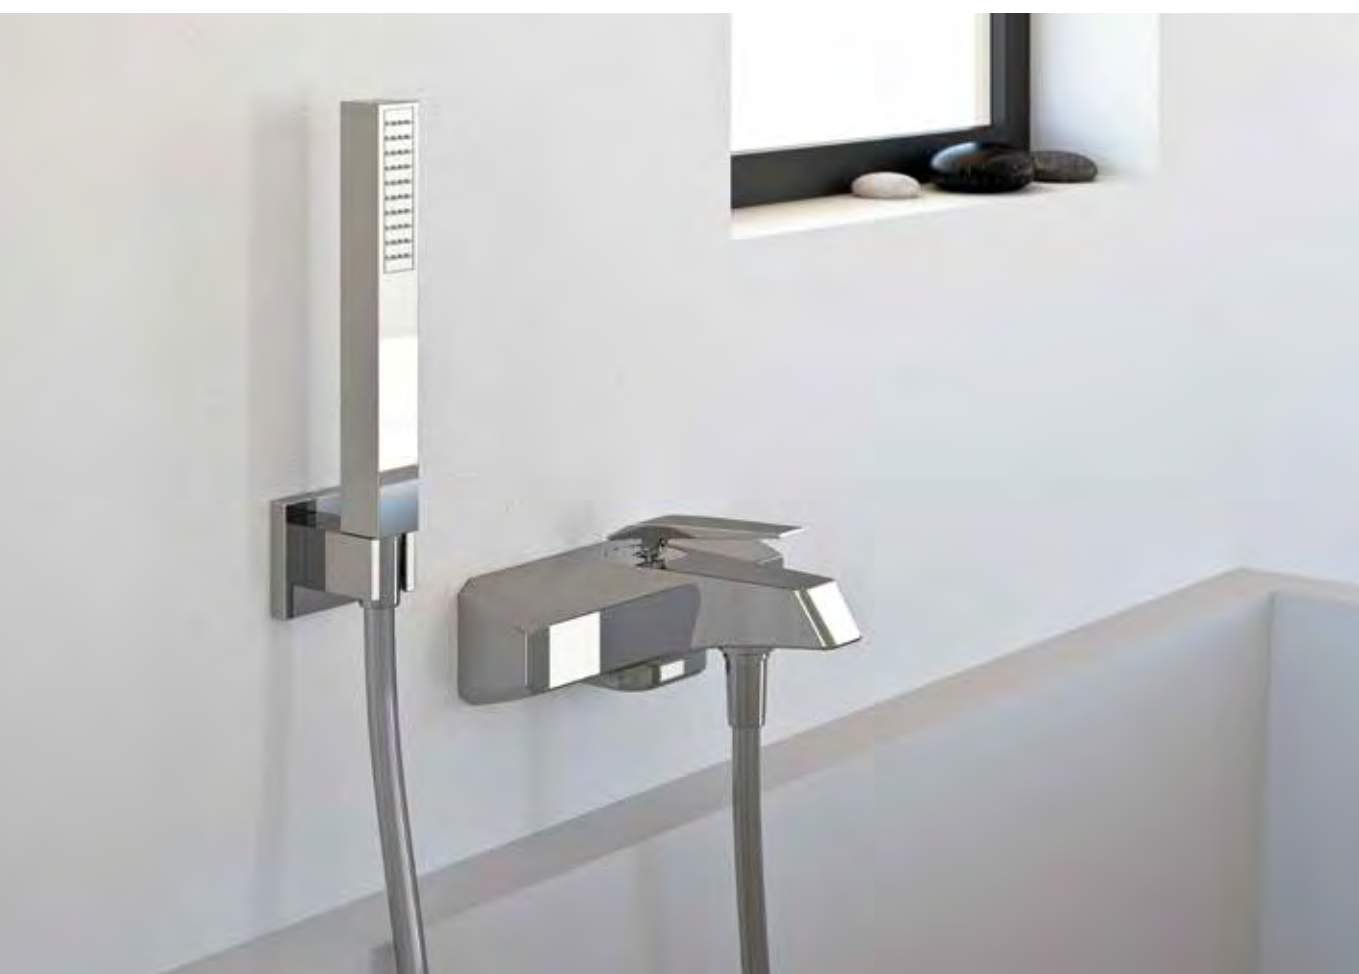

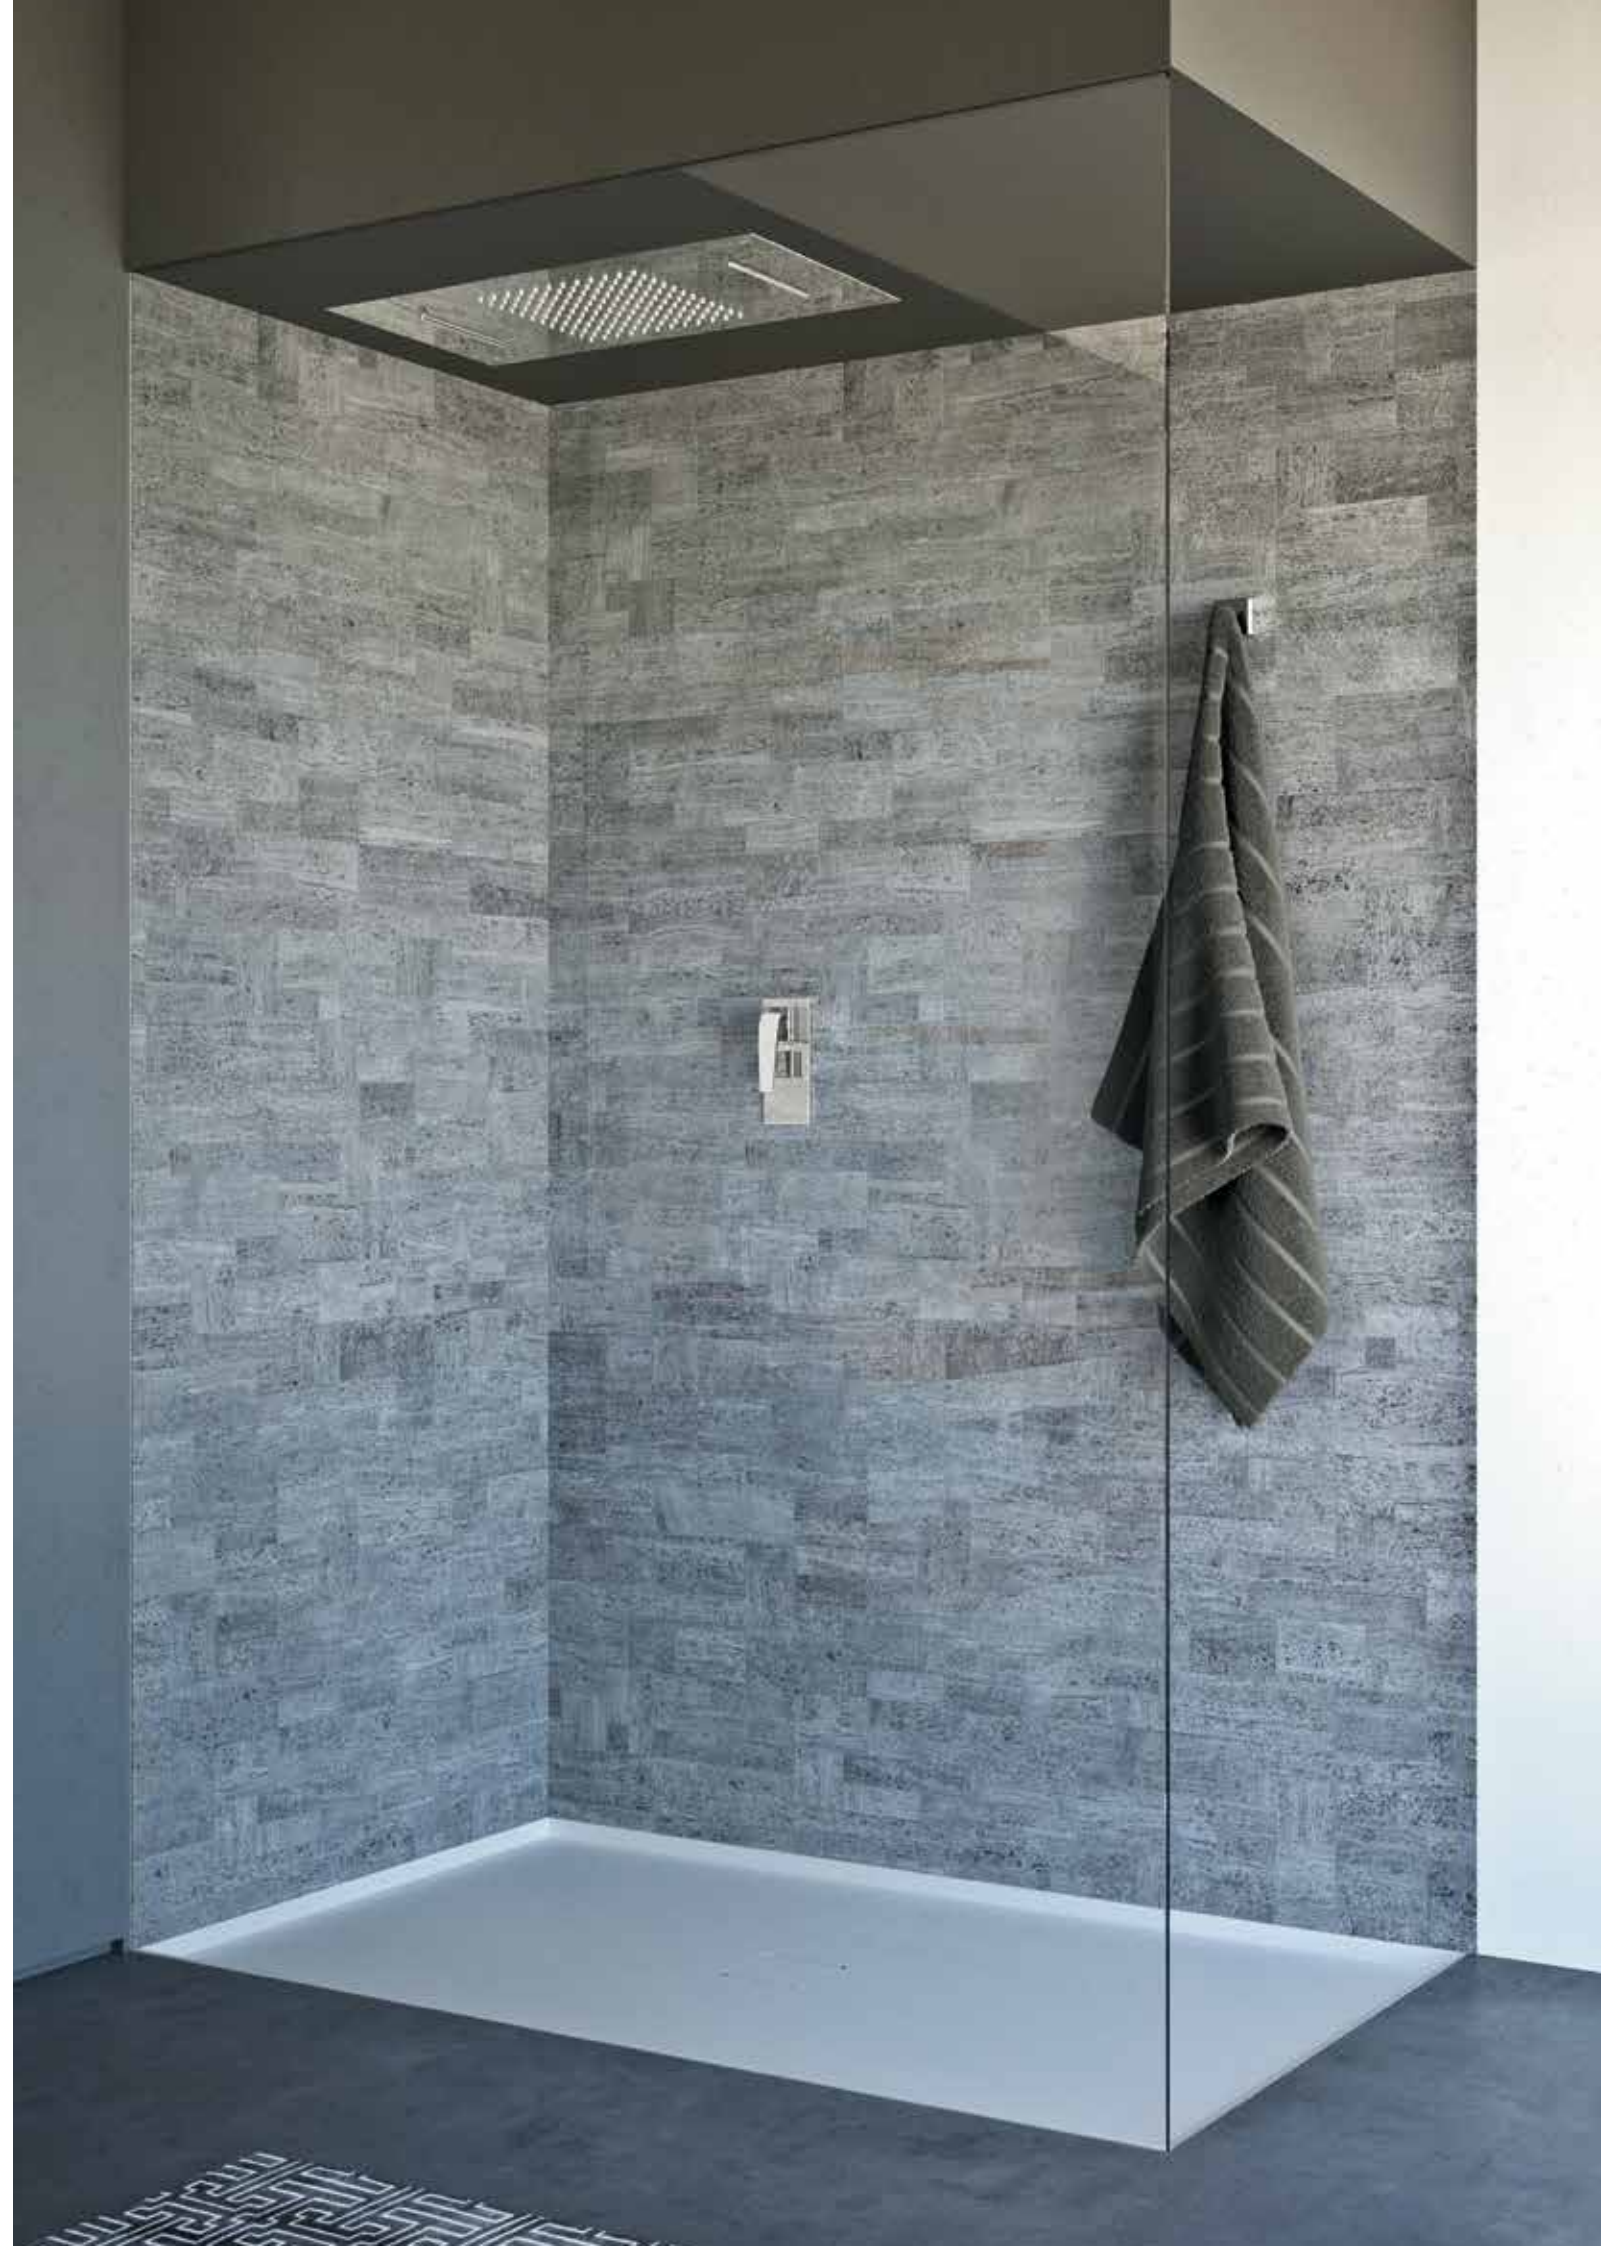

O₂. Leggero come l'aria, rigoroso come una formula chimica

Limpido nel disegno e pulito nelle forme, O₂ è un prodotto elegante, dalle linee semplici ed essenziali, capace di inserirsi con sobrietà nell'ambiente bagno contemporaneo. Le volumetrie esatte e razionali che lo caratterizzano accompagnano, con il loro rigore, il naturale flusso dell'acqua. Leggerezza e rigore compositivo. Queste le caratteristiche estetiche e progettuali di O₂. O₂ richiama l'ossigeno, la sua energia e il suo peso impalpabile e ne evoca la struttura chimica, precisa e puntuale. Due concetti apparentemente contrastanti conciliati, in un dialogo accattivante, dall'unione di due elementi compositivi molto diversi: una leva sottile e slanciata, ispirata alla leggerezza dell'aria, ed un corpo rigoroso e razionale, dai volumi netti e decisi. Per ritrovare in maniera semplice ed intuitiva i piaceri primordiali del contatto con gli elementi. E per trasformare il bagno nel luogo intimo e personale di un rituale capace di risvegliare la nostra energia più profonda. O₂, formula esatta del benessere quotidiano.

O₂. Light as air, rigorous as a chemical formula

Lightness and compositional rigor. These are the esthetic and design characteristics of O2. O2 refers to oxygen, its energy and its imperceptible weight, evoking its precise and punctual chemical structure. Two seemingly contradictory concepts reconciled in a captivating dialogue, the union of two very different constituent elements: a slim and subtle lever inspired by the lightness of air, and a rigorous and rational body with net and precise volumes. Clear in design and clean in forms, O2 is an elegant product with simple and essential lines, able to fit into the contemporary bathroom with sobriety. The exact and rational volumes that characterize O2 accompany, with their rigor, the natural flow of water to find again, in a simple and intuitive way, the primordial pleasures of the contact with the elements. And to transform the bathroom into the intimate and personal space of a ritual capable of awakening our deepest energy. O2: the exact formula for daily wellbeing.

STYLOS

Design - Marco Baxadonne

STYLOS. Neo Neoclassico. Geometrie Corinzie e proporzioni Vitruviane

Siamo sempre alla ricerca di nuove forme per imboccare nuovi percorsi. In questo caso un riferimento storicista è stato lo spunto per il progetto Stylos, che potremmo definire neo-neoclassico. Nella sua schematizzazione grafica, la Colonna di un tempio greco diventa il motivo per disegnare un nuovo rubinetto che riprende, sia nelle parti che nelle proporzioni, la colonna dell'ordine Corinzio ristilizzandola.

La base, il fusto, il capitello e l'intera altezza sono proporzionati in funzione del modulo, che sin dai tempi di Vitruvio, rappresentava il modo di esprimere i rapporti di un ordine architettonico.

STYLOS. Neo Neoclassic. Corinthian geometries and Vitruvian proportions.

We are always looking for new shapes to inspire new ideas. This time, a historicist reference has been the starting point for the Stylos project which we can define as Neo-Classical.

With its graphic schematization, the column of a Greek temple is the basic shape from which a new tap's design emerges, with its individual parts and proportions recapturing the style of the column in its evolved form, the Corinthian order. In fact, its base, column, capital and its whole figure are functionally proportioned to the module which, since the days of Vitruvius, has always signified a way of expressing architectural balance and harmony.

TOOL

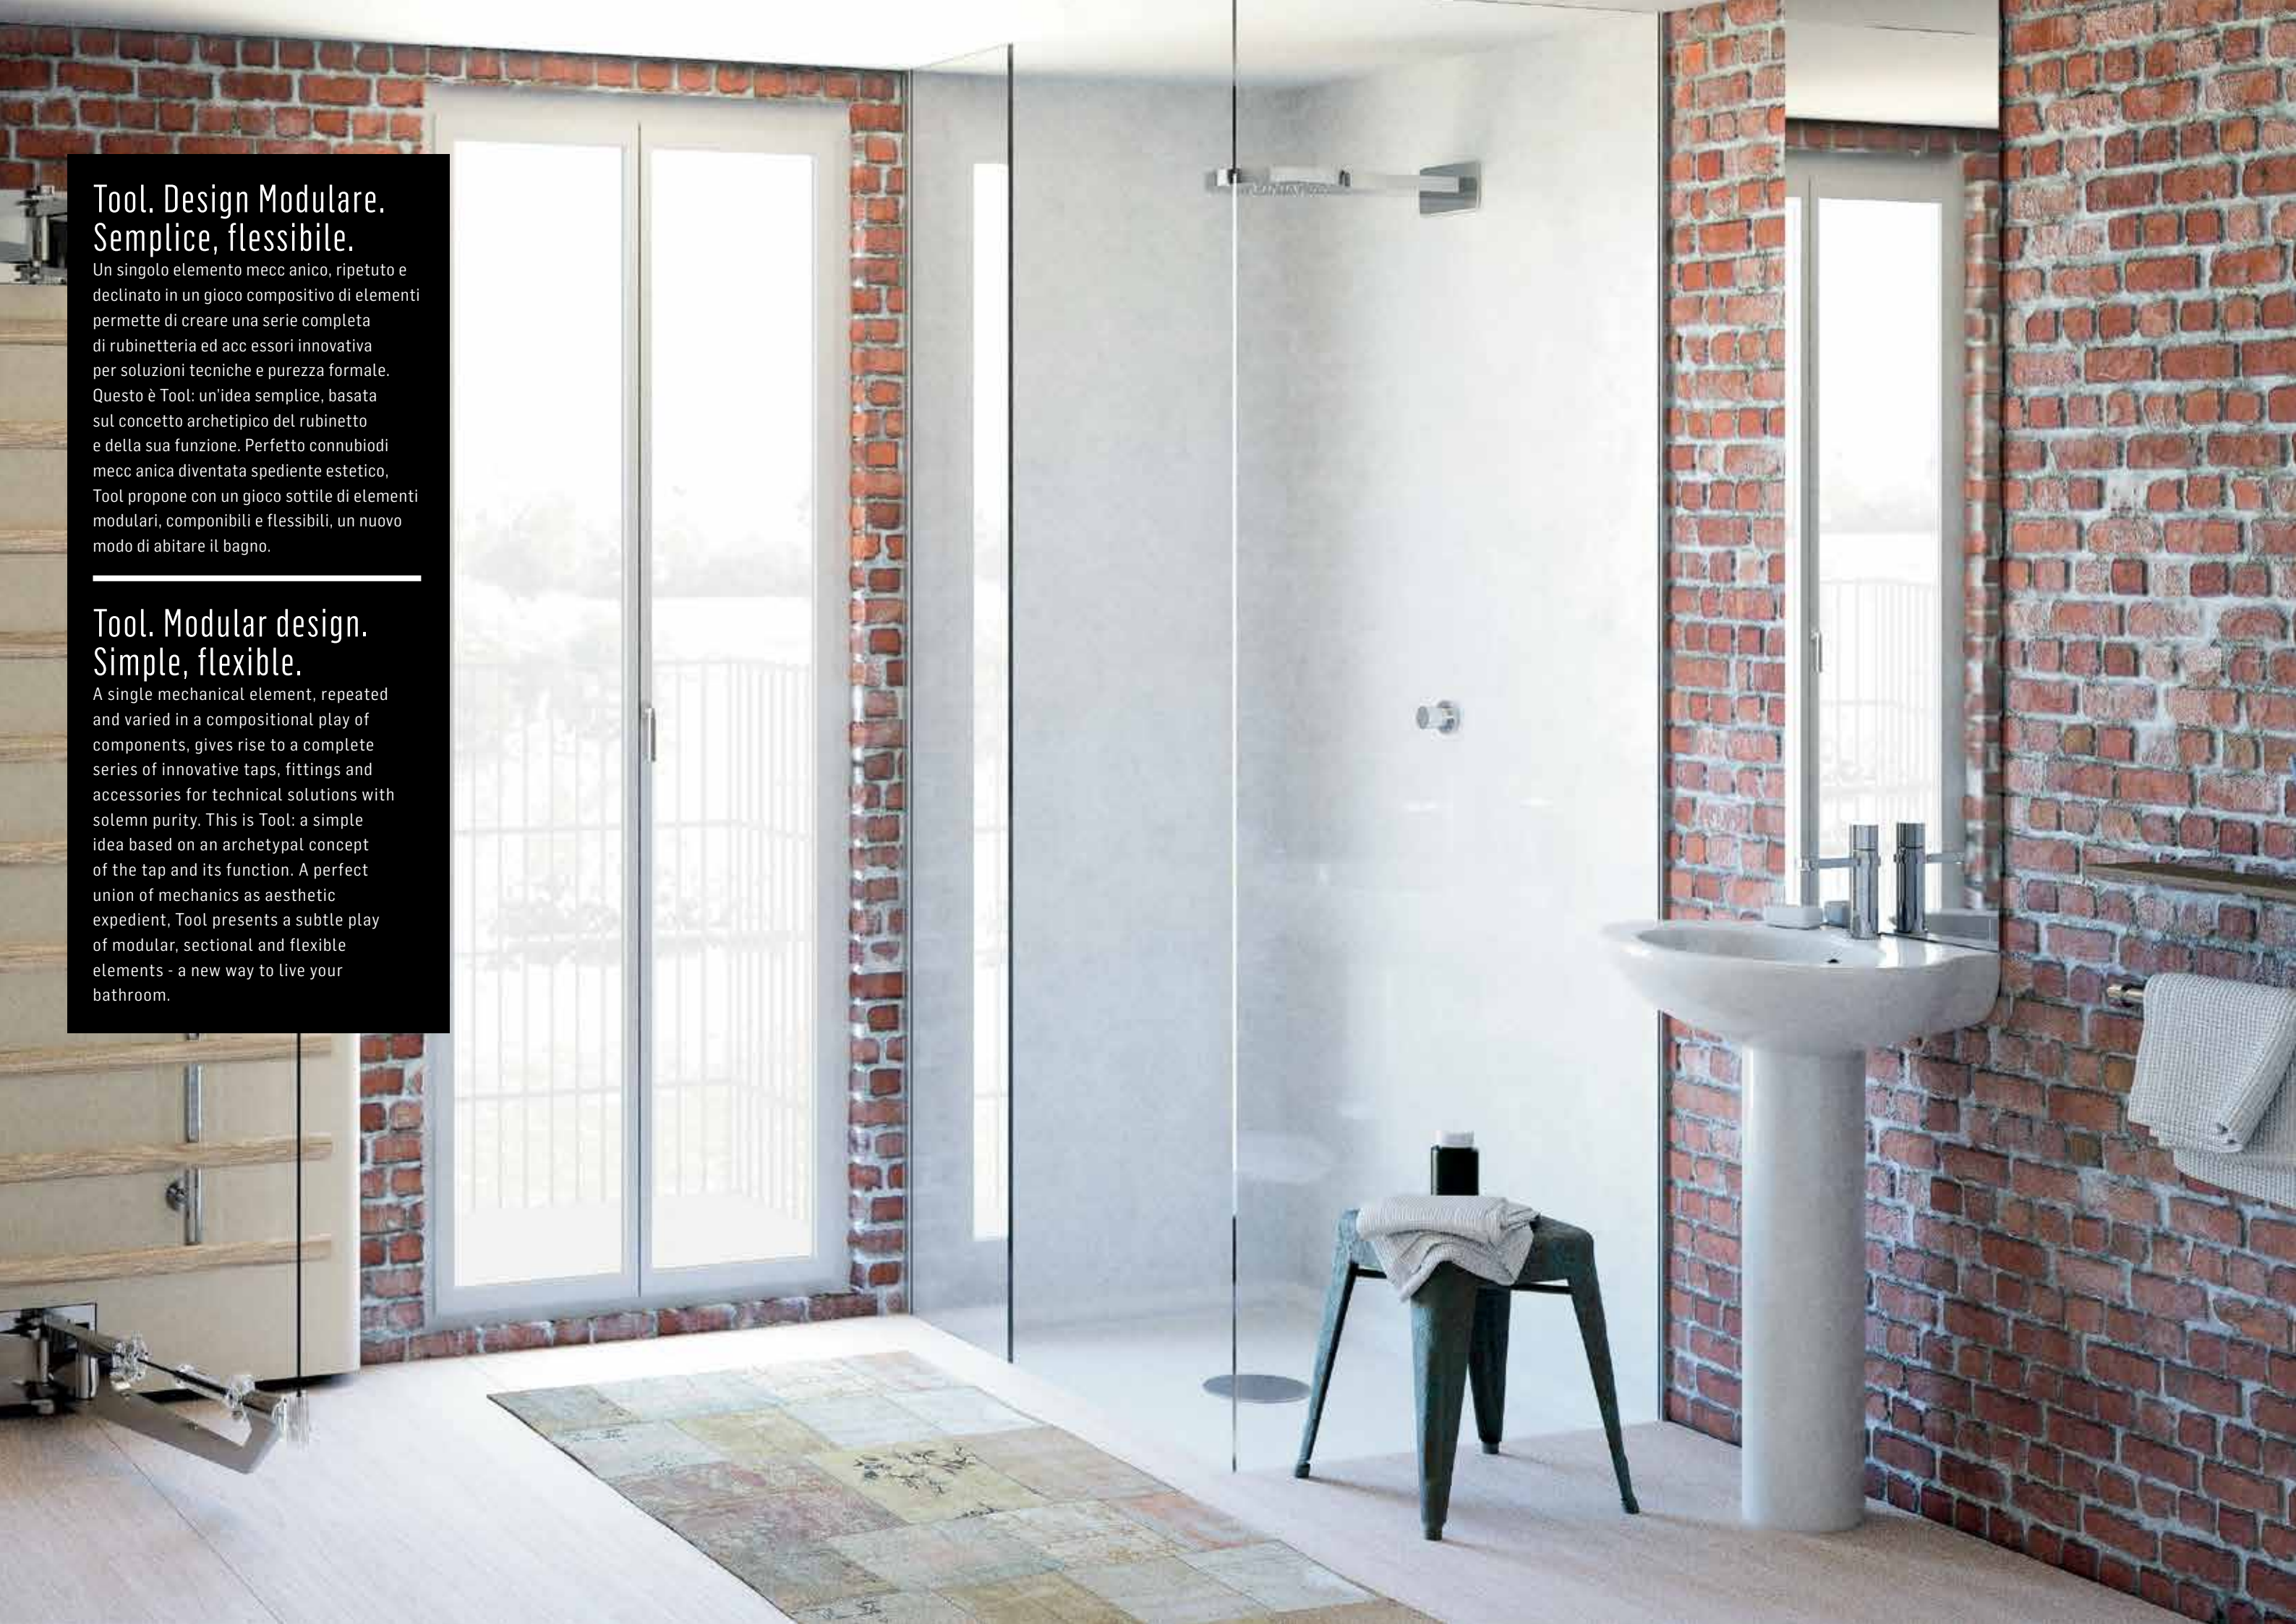

Design - Studio Spalvieri / Del Ciotto

Tool. Design Modulare. Semplice, flessibile.

Un singolo elemento meccanico, ripetuto e declinato in un gioco compositivo di elementi permette di creare una serie completa di rubinetteria ed accessori innovativa per soluzioni tecniche e purezza formale. Questo è Tool: un'idea semplice, basata sul concetto archetipico del rubinetto e della sua funzione. Perfetto connubio di meccanica diventata spedito estetico, Tool propone con un gioco sottile di elementi modulari, componibili e flessibili, un nuovo modo di abitare il bagno.

Tool. Modular design. Simple, flexible.

A single mechanical element, repeated and varied in a compositional play of components, gives rise to a complete series of innovative taps, fittings and accessories for technical solutions with solemn purity. This is Tool: a simple idea based on an archetypal concept of the tap and its function. A perfect union of mechanics as aesthetic expedient, Tool presents a subtle play of modular, sectional and flexible elements - a new way to live your bathroom.

FEEL

Design - Mamoli R&D

Feel. Purezza di stile e funzionalità

Feel esprime un design pulito, plasmato nel segno della razionalità e della purezza stilistica, grazie alla lucentezza delle sue superfici piane e dei tagli geometrici. Linee e forme modernamente razionali donano a Feel schematizzazione grafica e sobrietà, conciliando la purezza del minimalismo con le esigenze dello stile di vita quotidiano. Il rigore geometrico e il minimalismo maturo che lo caratterizzano restituiscono sensualità al metallo scintillante. Eleganza allo stato puro.

Feel. Style purity and functionality

With its shiny flat surfaces and geometrical lines, Feel has a streamlined look featuring both practicality and stylistic purity. Contemporary, practical lines and forms give Feel a clean, sleek design and sobriety by combining minimalist purity with the demands of a modern lifestyle. Its geometric rigour and mature minimalism give sensuality to the sparkling metal. Sheer elegance.

PICO

Design - Mamoli R&D

Pico. Piccola fonte di allegria

Pico T è un nuovo, divertente e pratico rubinetto dalla caratterizzazione moderna ed allegra. La sua forma è semplice ed immediata come quella di una fontanella. La sua pratica leva colorata introduce una nota personale e giocosa all'ambiente in cui è inserito. A partire da 8 colori, come in uno spartito puoi creare la sinfonia che più ami.

Pico. Source of water, wellspring of happiness

Pico T is a new, fun and practical tap with a modern, cheerful look. Its shape is simple and immediate, just like a fountain. Its practical coloured handle introduces a personal, playful note wherever it is placed. Just like with sheet music, you can use the 8 different colours to create the symphony you love most.

CROSS

Design - Mamoli R&D

Cross

In una contemporaneità complessa e in rapida evoluzione, siamo alla ricerca di semplicità e di idee che ci permettano di avere una visione chiara delle cose. Cross è una di queste idee. Sottile nella forma, chiara nella funzione e semplice nel suo effetto. Attuale, perché è minimalista senza compromessi, senza elementi di disturbo, senza decorazioni superflue. Versatile, perché con la sua essenzialità apre nuove prospettive alla progettazione del bagno contemporaneo, dove il design, l'architettura e l'individualità sono un must assoluto. Glamour o discreto, purista o stravagante, Bauhaus o postmoderno: Cross saprà sempre caratterizzare lo spazio con forme che offrono semplicità. Forme che sopravvivono ai nostri tempi in rapido cambiamento.

Cross

In our complex and rapidly-evolving contemporary world, we are always on the lookout for simplicity and ideas that can give us some clarity of perspective. Cross is one of those ideas. Slender in form, clear in function and simple in design. Up-to-date, with its uncompromising minimalist design, without unnecessary elements and superfluous decorations. Versatile, because its essentiality opens up new perspectives to the design of the contemporary bathroom, where design, architecture and individuality are an absolute must. Glamour or discreet, purist or extravagant, Bauhaus or postmodern: Cross will always characterize any space with the simplicity of its forms. Forms that can outlast our times of rapid change.

BELGRAVIA

CHELSEA

Design - Mamoli R&D

Belgravia. Eleganza old england e design contemporaneo

Immergetevi con Belgravia nel puro fascino delle calde atmosfere dei grandi bagni del passato, per rivivere oggi la raffinatezza delle più esclusive tradizioni europee. Le sue manopole in porcellana bianca, semplici ed eleganti, regalano un design classico e senza tempo, rimandando a epoche lontane e alle grandi magioni londinesi, finemente decorate in stucco bianco. Una serie completa di rubinetteria e accessori per il bagno che combina linee tipicamente Old England alla natura essenziale del design contemporaneo e alle più avanzate tecniche di produzione. Belgravia: un soffio di fin de siècle, perché l'eleganza è senza tempo.

Belgravia. A blend of upper class old england & fashionable new design

Plunge in the upper-class charm with Belgravia to relieve the refined European traditions today. The simple and yet elegant white porcelain handles outlines a classical and historical design, recalling far off times and Londoner grand white stuccoed houses. A complete series of faucets and bathroom accessories combining typically Old England lines and traditional styles with the essential nature of contemporary design and last generation production techniques and materials. A breath of fin de siècle, since elegance is timeless.

Chelsea. Sofisticata estetica retrò, puro glamour vittoriano

Chic, con un impatto estetico deciso.

Linee fluide ispirate alla sofisticata estetica retrò e alle effervescenti atmosfere dell'esclusivo quartiere londinese. Questa è Chelsea, una serie elegante che prende spunto dal design più classico arricchito da una personalità tutta sua, grazie alle splendenti maniglie SWAROVSKI ELEMENTS e alle finiture preziose.

Classy e con un appeal brillante, lussuosa e sensuale, Chelsea è una serie completa di rubinetteria e accessori per il bagno dove l'eleganza e la raffinatezza si fondono con armonia per creare uno stile senza tempo. Per rivivere il glamour del passato in un presente raffinato ed elegante.

Chelsea. Trendy sophistication back to a swinging victorian luxury

Effortlessly chic though with a decisive aesthetic impact.

Beautiful, flowing lines inspired by sophisticated retro styles and by the sparkling London Royal Borough's atmospheres.

This is Chelsea, an antique inspired design with a personality on its own with its SWAROVSKI ELEMENTS handles and its beautiful luminous finishings. Classy though with a swinging appeal, luxurious yet sensual, Chelsea is a complete series of bathroom fittings and accessories where elegance and finesse blend together to create a timeless style, to live a past rich grandeur back in a refined and elegant present.

Epoca

Design - Mamoli R&D

Epoca. Timeless icon of contemporary tradition

Epoca. Icona senza tempo di classica eleganza

Epoca. Icona senza tempo di classica eleganza

La vita dei nostri tempi è senz'altro una vita stressata, convulsa, senza pause.

C'è gente che dopo una giornata di e-mail, di new economy, di hard disk, di fast food, si concede una full immersion in un'altra epoca e si rilassa. Come?

Si immerge nella vasca da bagno, gira le classiche manopole dell'acqua calda o fredda di Epoca, per dare l'ultimo tocco di temperatura all'acqua e si ritrova improvvisamente in un'altra atmosfera, in un'altra epoca, nella quale farsi il bagno significa concedersi il tempo per rilassarsi.

Epoca. Timeless icon of contemporary tradition

Life in our times is undeniably hectic, stressful, without respite.

There are people who after a day of e-mails, new economy, hard disk and fast food treat themselves to a full immersion in another epoch, and relax. How? By easing into the bath and turning Epoca's classic hot and cold taps to get just the right temperature and suddenly find themselves in an other atmosphere, in another era, when having a bath meant taking time to relax.

4414 E1

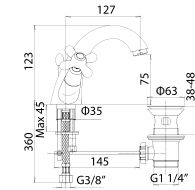

Miscelatore tradizionale monoforo per lavabo con scarico da 5/4" e tubetti di alimentazione flessibili.

Single hole basin mixer with 5/4" pop-up waste and flexible connection hoses.

Design - Mamoli R&D

Con il programma Wellness di Mamoli, è possibile dare spazio alla fantasia progettuale, per realizzare la SPA domestica ideale. I soffioni altamente performanti e i punti di erogazione liberamente combinabili nell'ambito dell'architettura del sistema, consentono una progettazione e una configurazione personalizzata della zona doccia. Getti a soffitto accarezzano il corpo con una pioggia d'acqua, soffioncini laterali lo avvolgono aggiungendo una nuova dimensione all'incontro con l'elemento e tiepide cascate lasciano scorrere l'acqua in modo naturale, delicata o vigorosa a seconda della sensibilità individuale. Il programma Wellness, grazie alla sua completezza e flessibilità, si inserisce in modo armonico sia nei nuovi progetti che in ambienti bagno già esistenti ed configurabile con qualsiasi serie Mamoli. Per mettere sempre l'acqua in primo piano.

Mamoli Wellness program allows scope for fantasy to achieve the perfect home spa. The highly performing showerheads and jet spray settings are freely combinable within the system architecture, permitting a personalized configuration of the shower area and enhancing individual bathroom rituals. Ceiling jets caress the body with a water rain, sideshowers surround it by adding a new dimension to the encounter with the element and warm waterfalls let the water run naturally, gentle or vigorous, depending on individual sensitivity. The Wellness Program, thanks to its completeness and flexibility, fits harmoniously both in new projects and in existing bathrooms and can be configured with any Mamoli serie, becoming part of a personal ritual and lending a new quality to the shower experience.

Programma cucina Kitchen program

Design - Mamoli R&D

Il cibo oggi non è più soltanto un bisogno fisiologico ma una necessità culturale. La cucina, i modi di stare a tavola e i processi del gusto sono senza ombra di dubbio forme di linguaggio e il cibo, così come la casa, racconta l'individuo e la sua personalità. La scelta degli alimenti, gli accostamenti fra sapori e sostanze sono segni, strumenti mediante cui si parla del proprio mondo. Il concetto di cucina come fulcro e racconto ha dato vita al "Kitchen Program" di Mamoli, una gamma di rubinetteria dedicata ad offrire la massima libertà al gesto, alla spazialità e ai modi di cucinare del singolo individuo. Perché niente è più identitario del cibo e della casa.

Food today is no longer just a physiological need, but a cultural necessity. The kitchen, the ways of being at table and the processes of taste are, without a shadow of a doubt, forms of language; food, like the home, tells of the individual and their personality. The choice of food, the combinations of flavours and substances, are signs, instruments through which we speak of our world. The concept of the kitchen as fulcrum and story to be told has given rise to Mamoli's "Kitchen Program", a range of taps and fittings devoted to offering the maximum freedom to the individual's gestures, spatiality and ways of cooking. Because nothing is more important for the self-image than food and the home.

BOLD

Design - Marc Sadler

Bold by Marc Sadler.

Armonia e contemporaneità.

Questo è il binomio che descrive la serie Bold: una serie completa di rubinetteria e accessori per il bagno dalla linea leggera ed elegante, con un rapporto qualità-prezzo estremamente favorevole.

Tonda, morbida, aggraziata e caratterizzata da un design essenziale, pulito e contemporaneo, Bold è il risultato della esplicita volontà di creare un prodotto elementare, semplice e istintivo. Il dialogo continuo di linee ed angoli dolci danno volume a forme pure ed eleganti, nuove ma al tempo stesso di facile lettura, dal tratto pulito.

In Bold l'attualità delle forme, si unisce alla tecnologia costruttiva più avanzata rendendola conforme ai requisiti delle norme europee e una soluzione flessibile capace di adattarsi a ogni tipologia di ambiente bagno, per il residenziale come per il contract.

Bold by Marc Sadler.

Balance and contemporaneousness.

It is the synergy describing the series called Bold, a soft and elegant designed set of taps and fittings for the bathroom, whose relationship between price and quality is indeed advantageous. Round shaped, soft and stylish, characterized by a fair, basic, up-to-date design, Bold is the result of purposely creating a plain, basic and natural product. The continuous exchange between lines and smoothed angles do bring into volume pure and elegant shapes, which are indeed new, though easily readable as well, and essentially designed.

In Bold its up-to-date shapes mingle with a useful, advanced technology making the series in compliance with the EU's requirements and regulations and being a flexible solution fitting any bathroom environment: from housing to contract.

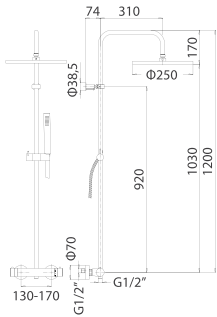

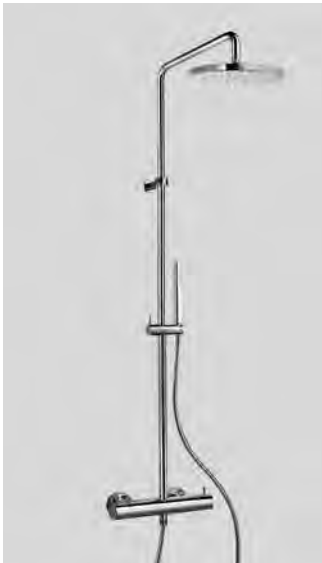

3827/0822

Logos

Design - Mamoli R&D

Logos High design & low cost

Voglia diffusa di design e capacità di spesa rarefatta ? La risposta arriva da Mamoli, con Logos, monocomando interamente made in Italy, per chi al design non vuole proprio rinunciare.

Logos nasce da una visione razionale del progetto che ha consentito a Mamoli di realizzare un prodotto che è sintesi di economicità e bellezza.

Linee rette e semicirconferenze, superfici piane e profili avvolgenti si incontrano coerentemente nelle forme di Logos, ispirato al design anni '70.

Logos High design & low cost

A widely felt longing for top design and a limited budget ? Here's Logos by Mamoli, a 100% Made in Italy, single lever mixer for those who really cannot do without design. Logos arises out of a rational vision of the project that has allowed Mamoli to create a product that combines low cost with striking beauty. Straight lines and semicircumferences, flat surfaces and enveloping profiles are harmoniously united in the shape of Logos that recalls 1970s design.

Professional Professionals

Design - Mamoli R&D

Increasing attention is being devoted to the rigorous respecting of hygiene regulations, particularly in public areas. Today more than ever delicate environments, such as hospitals, clinics and medical practices, but also places of relaxation and entertainment, such as hotels, restaurants and shops, require security and high performance levels from products. Mamoli proposes a wide range of solutions to satisfy these requirements, combining simplicity of use, functionality, technological quality and respect for the national and European regulations governing the planning of public spaces, rendering obligatory the use of taps and fittings operated without the need for contact with the hands. Hence the "Mamoli no touch" programme: a complete range envisaging long-lever mixer and pedal taps, electronic - battery or mains powered - and time switch operated, devoted to all the spheres of community living. Technologies that are faultless from the hygienic point of view, which - as they operate within a given time frame - automatically allow water and energy savings that are fundamental in public spaces. By combining technology and simplicity of use, Mamoli therefore succeeds in offering solutions that are able to satisfy all these requirements, offering specific products for various uses: washbasins, showers, urinals, all operated without the need for any contact.

Sempre più attenzione viene riservata al rigoroso rispetto delle norme d'igiene, soprattutto in ambiti di vita collettiva. In particolare la rubinetteria azionata senza necessità di contatto con le mani trova impiego laddove si richiedono particolari cautele, come ospedali, cliniche, studi medici e dentistici, esercizi pubblici in genere. Le normative, sia nazionali che europee, impongono l'obbligatorietà di erogare acqua senza contatto, in tutti questi esercizi. Mamoli propone un'ampia gamma di soluzioni per soddisfare tali esigenze, coniugando semplicità d'uso, funzionalità e qualità tecnologica. La serie di miscelatori monocomando dotati di leva, di comando allungata è pensata per essere azionata con l'avanbraccio ed è proposta per diverse applicazioni, sia a lavello che a parete. Più sofisticata è la rubinetteria a comando elettronico: con un semplice movimento delle mani nel campo di intervento del comando a raggi infrarossi, o avvicinandosi all'apparecchio, nel caso di docce ed orinatoi, consente di ottenere l'erogazione dell'acqua. Permette inoltre un risparmio dei consumi, poichè l'erogazione viene automaticamente limitata alla sola fase di lavaggio. Mamoli offre una serie di modelli per diversi utilizzi: lavabi, docce, orinatoi, tutti azionati senza bisogno di alcun contatto.
